DETAILED ACTION

1. The Examiner has carefully considered Applicant's amendments and accompanying remarks dated 02/14/05. Applicant's amendments to claims 1 and 2 to add the additional layer have been entered. Applicant Terminal disclaimers over the 3 cited applications have also been entered and overcome the double patenting rejections made in the previous office action in paragraphs 1 and 2. All previously made rejections are now withdrawn in light of the amendment and remarks and new art rejection has been set forth below necessitated by amendment.

Response to Arguments

2. Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States:

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5783503 issued to Gillespie et al.

5. Gillespie et al disclose multi-component fibers and the products made from the same (column 1). Such products may be sanitary products, disposable absorbent garments, wipes, diapers, medical barrier fabrics, and filtration media (column 6). The filaments of the invention include sub-denier or micro denier filaments of increased strength, softness and barrier that can be used in a variety of products (column 2), using continuous thermoplastic filaments (column 3). The reference further teaches the use of applying top sheets, back

sheets and other meltblown films (column 7) to the composite, thereby meeting the newly added limitation.
